

QIN Haiyan

QIN Haiyan, Vice President of World Wind Energy Association (WWEA), Vice-Chairman of IEC System for Certification to Standards Relating to Equipment for Use in Renewable Energy Application (IECRE), Vice-Chairman of IEEE PES Energy Development and Power Generation Satellite Committee-China “ Carbon Neutral&Technologies for GHG Mitigation&Adaptation Subcommittee”, General Secretary of Chinese Wind Energy Association (CWEA), General Secretary of Expert Advisory Committee for Zhangjiakou National Renewable Energy Demonstration Area, Director of National Offshore Wind Power Equipment Quality Supervision and Inspection Center, Director of China General Certification Center (CGC). He serves as committee member of National Technical Committee for Standardization of Wind Machinery, China Association for Consumer Products Quality and Safety Promotion and is also invited by IRENA, UNDP and ADB to serve with his expertise in the field of renewable energy.

He is a member of the National Technical Committee on Wind Machinery Standardization, China Association for the Promotion of Consumer Product Quality and Safety, and an independent expert employed by International Renewable Energy Agency (IRENA), United Nations Development Program (UNDP), World Bank (WB) and other international organizations.

He has more than 24 years of experience in testing and certification, and has long been engaged in technology research and evaluation, international promotion and application in wind energy, solar energy and other fields. He has presided over and participated in many national 863 program projects, national science and technology support projects and international cooperation projects. At the same time, He is deeply involved in the formulation and revision of China's Renewable Energy Law and the Renewable energy development Plan of the 13th Five-Year Plan and 14th Five-Year Plan, and is well versed in the development policies and technology application of the renewable energy field.
